

CALL FOR PAPERS

CARBON & CLIMATE LAW REVIEW (CCLR)

The editors of the Carbon and Climate Law Review, an international publication dedicated to climate law and the carbon markets, are pleased to invite you to contribute to the upcoming issues of our journal. As the first journal focused on the legal dimensions of climate change, CCLR provides academics and practitioners with a forum for important debates in this space.

Published on a quarterly basis under the guidance of a distinguished editorial board, CCLR brings together representatives from the legal discipline and other stakeholders in one specialised journal, allowing them to engage in a dynamic debate on the law of climate change.

Potential authors are invited to submit articles (up to 20 pp.), country reports (up to 6 pp.) and book reviews (1-3 pp.) for the upcoming issues of CCLR.

To guarantee CCLR's high-quality standards, all submissions are peer-reviewed and are required to conform to the author guidelines available at:

www.lexxion.eu/cclr-authors

All submitted articles undergo a double blind peer review process.

Submission Deadline:

We accept submissions on a rolling basis.

Please send your submission by the indicated deadlines to the Section Editor.
