- eIDAS Regulation
- Trust Services and E-identification
- Public Transportation
- e-School Case Study
- e-Health Case Study
- e-Tax Case Study
- i-Voting Case Study
- e-Residency Case Study

General Information

Overview

According to the European Commission, effective e-Government can provide a wide variety of benefits including more efficiency and savings for governments and businesses, increased transparency, and greater participation of citizens in political life.

The potential cost savings are massive, as stated by the EC. In Denmark, for example, electronic invoicing saves taxpayers €150 million and businesses €50 million a year. If introduced across the EU, annual savings could exceed €50 billion. In Italy alone, e-procurement systems cut over €3 billion in costs.

During this interactive workshop the leading experts are introducing the numerous possibilities of e-Governance, where you have an opportunity to get inspired by the case study of e-Estonia and find ways how to apply this knowledge in your own country.

Our experts will give you an overview of e-Governance in three parts:

- Introduction to e-Governance
- Applying E-Governance Tools in Different Sectors
- Future of E-Governance

Methodology

- The participants will be actively involved in the course. The sessions will combine presentations, case studies and discussion on practical problems. You will have ample opportunities to present your own problematic issues and discuss them with the speakers and participants from other countries.
- Just send us your cases and questions in advance! We will forward them to our speakers, who will include your issues in the programme and answer them during the workshop. All information concerning such problems and cases will be treated confidentially.

Target Group

- People working with digital developments from the following institutions:
- Public authorities on EU, national and regional level
- Non-governmental organisations (NGOs)
- Consulting companies and legal practitioners
- Academic institutions
