Overview

The new 2021 – 2027 programming period introduces some **considerable changes in the financial allocation and management and control system of EU Funds**. The **2020 amendment of the 2014-2020 regulations, caused by COVID-19**, will additionally **affect the financial management and control system of the new programming period 2021-2027**. Our experts will help you to understand how these **novelties will affect your day-to-day work** in the future. Moreover, this course comes exactly at the right time when you are **finalising and negotiating your Operational Programmes with the European Commission**. **How to modify your Operational Programmes during the negotiation process? Which comments are the most relevant and how to implement them?** Our experts will help you to overcome possible challenges using their rich experience gained throughout previous years.

Methodology

An interactive online course by Lexxion Publisher combines presentations, cases studies and discussions on practical problems. All **speakers present live** via video and audio. **Participants are actively involved** in the online courses. By offering our participants the possibility to **use their microphones and cameras** during the whole course, we aim to recreate the atmosphere of a face-to-face Lexxion course. We encourage our participants to **ask questions in real time and to take part in live discussions** with speakers and other participants. Additionally, we offer **breakout sessions**, as part of this format, where **participants work in smaller groups on real-life cases and exercises**. During these exercises, participants have the technical possibility to see other group members and talk to them (using microphone and camera). There are ample opportunities for the **participants to present their own problematic issues**, discuss and solve them with the speakers and participants from other Member States.
