Overview

Monitoring and evaluation are key tasks for a successful management and a transparent implementation of projects financed with ESI Funds. Those in charge of these tasks are therefore in need to keep updated with new rules and tools. How to define indicators? How to monitor progress? How to select a correct evaluation method? These and other questions will be addressed in this hybrid workshop, where participants will have the opportunity to gain theoretical and practical insights guided by our experts. They will also have the chance to compare their experience with that of their peers from other Member States.
